Emmanouil (Manos) Vourtsanis

Software Engineer in Test · Playwright · API & AI-assisted testing

Athens, Greece · manosvourtsanis7@gmail.com · +30 698 374 7125 · linkedin.com/in/manosvou · github.com/ManosVourtsanis

SUMMARY

Software Engineer in Test with 3.5 years at Kaizen Gaming (Betano), automating tests for regulated, high-traffic betting products with Playwright and BDD. Freelance full-stack engineer on the side, shipping web and mobile apps for a client. I use AI coding agents (Claude Code) every day to write code and tests faster, and I review every generated change before it ships. ISTQB Foundation Level certified.

SKILLS

Test automation	Playwright (TypeScript, C#), Reqnroll/SpecFlow (BDD), Page Object Model, cross-browser testing (Sauce Labs)
API testing	Postman, API tests in code with Playwright, data validation with SQL
AI	Daily use of AI coding agents (Claude Code) to write and review code and tests; fine-tuned a BERT model for free-text bet parsing
CI & tools	GitHub Actions, Git, Chrome DevTools, SQL Server, Databricks, Agile/Scrum
Development	TypeScript, C# / .NET 8, Java / Spring Boot, React, Next.js, React Native / Expo, MongoDB, Supabase, Firebase

EXPERIENCE

Software Engineer in Test · Kaizen Gaming (Betano) — 04/2023 – Present · Athens

- Helped set up and maintain a BDD test-automation suite with Reqnroll/SpecFlow and Playwright in C#.
- Wrote unit tests to raise coverage on backend services.
- Designed and documented 500+ test scenarios for betting and regulatory-reporting features.
- Specialised in regulatory reporting for betting; verified report data with SQL Server and Databricks.
- Tested APIs with Postman, debugged with DevTools and ran cross-browser checks on Sauce Labs.

Full-Stack Engineer (Freelance) · Seago — 06/2025 – Present · Remote

Marketplace for boat rentals, sea transfers and experiences, live on iOS, Android and web.

- Build and maintain the web app from the shared React Native (Expo) codebase, and work on the backend.
- Run the release-to-web merge for every mobile release, with written rules for conflicts, backups and rollback.
- Built e-Charter, a side product for yacht charters (Spring Boot, React + Vite, MongoDB) that turns charter details entered online into complete, printable charter documents.

Intern Software Engineer · METRO AEBE — 07/2019 – 09/2019 · Athens

- Built an MVC app for managing in-store screen ads across the supermarket chain, and the Android app that displays them.

Also: Customer service, Village Cinemas (11/2022 – 02/2023).

PROJECTS

Tested portfolio site · github.com/ManosVourtsanis/boyhood

- Playwright suite on desktop and mobile viewports, run in GitHub Actions on every push. The GitHub API is mocked to cover pagination, rate limits, network errors and HTML injection.

Playwright test automation framework · github.com/ManosVourtsanis/saas-test-automation-template

- UI and API tests in TypeScript with Page Objects, running on Chromium, Firefox and WebKit.

Premier Bet · Next.js, .NET 8, BERT

- Lite betting app with a fine-tuned BERT model that turns a free-text request into bet selections. Also my Playwright playground.

DOM Quiz App · React Native (Expo), TypeScript, Supabase

- Cross-platform quiz app with real-time multiplayer rooms, live scoreboards, friends and offline support.

CERTIFICATIONS & TRAINING

ISTQB CTFL (Foundation Level), 12/2025

Playwright training seminars (attended)

EDUCATION

Technical University of Crete, Electrical & Computer Engineering (most coursework completed; studies on hold)

LANGUAGES

Greek: native

English: C2 Proficiency

French: B2 (Sorbonne)
